

XAUUSD Auto Trading Bot — Full Documentation

Version 7 | March 2026 | Opus 4.6 Refined

Overview

An automated XAUUSD (Gold) trading bot using ICT/SMC (Inner Circle Trader / Smart Money Concepts) strategy. Runs on Mac with MetaTrader 5 via Wine, controlled by Python via TCP socket.

Current Performance (60-day backtest):

- Win Rate: 58% | Profit Factor: 2.07–2.36 | Max DD: 1.4%
-

Architecture

```
Python bot_free.py ←TCP→ XAU_Bot.mq5 → MT5 Account
Python pdhl_bot.py ←TCP→ PDH_Bot.mq5 → MT5 Account
```

- Bot 1 port: 8080 (webhook) / 9999 (EA)
 - Bot 2 port: 8081 (webhook) / 9998 (EA)
-

Quick Start

```
bash ~/Desktop/XAUUSD_Bot_Project/start_bots.sh
```

Then in MT5:

1. Click ► Algo Trading (green)
 2. Drag XAU_Bot onto XAUUSD M15 chart
 3. Drag PDH_Bot onto XAUUSD M5 chart
-

ICT/SMC Signal Logic (v7)

Step 1 — Bias (1H timeframe)

EMA50 vs EMA200 on 1H candles. BEAR = $EMA50 < EMA200$. Currently: SHORTs only (LONGs have 25% WR in bear trend).

Step 2 — ADX Regime Filter (NEW — Opus 4.6)

ADX > 20 required. Ranging markets (ADX < 20) are skipped entirely. Impact: WR improved from 50% → 58%.

Step 3 — Session Filter

Only trades during best hours (UTC): 9, 12, 13, 17, 18, 20. (IST: 2:30PM, 5:30PM, 6:30PM, 10:30PM, 11:30PM, 1:30AM) Impact: WR improved from 36% → 50%.

Step 4 — RSI Filters

- Block if RSI > 78 or < 22 (extreme exhaustion)
- SHORT requires RSI > 52 (momentum confirming)

Step 5 — POI Detection (IMPROVED — Opus 4.6)

Fair Value Gap (FVG):

- Minimum gap size: $0.3 \times \text{ATR}$ (~\$4-6)
- Requires displacement candle after gap
- Checks for mitigation (already filled = skip)

Order Block (OB):

- Last opposing candle before displacement
- Price must be inside OB range

Step 6 — Confirmation

One of: liquidity sweep, momentum candle, EMA20 cross

Step 7 — PD Array Filter

SHORT only when price > 20-bar midpoint (premium zone). LONG only when price < 20-bar midpoint (discount zone).

Step 8 — Quality Score (>60 required)

Composite score: bias strength + POI + confirmation + RSI position + displacement. Scores below 60 are filtered out.

Risk Management

Setting	Value
Risk per trade	1% of balance
Max lot size	0.5
Stop Loss	$0.8 \times \text{ATR}$
TP1	1.0R — 50% close, move SL to BE
TP2	Adaptive: 1.26R (high vol) / 1.8R (normal) / 2.52R (low vol)
Partial close	At +8 pips profit
Trail start	+8 pips
Trail distance	5 pips
Cooldown	45 minutes between trades
Re-entry	1× allowed after WIN within 2 hours

Manual Controls

Close all trades:

```
curl -X POST http://localhost:8080/webhook \
-H 'Content-Type: application/json' \
-d '{"secret":"piyush_xau_bot_2026","signal":"CLOSE"}'
```

Partial close (50%):

```
curl -X POST http://localhost:8080/webhook \
-H 'Content-Type: application/json' \
-d '{"secret":"piyush_xau_bot_2026","signal":"PARTIAL"}'
```

PDH/PDL Bot (Bot 2)

Watches Previous Day High (PDH) and Previous Day Low (PDL).

BREAKOUT setup: Strong close beyond PDH/PDL + displacement → trend continuation. **REVERSAL setup:** Wick beyond PDH/PDL + close back inside + MSS → counter-trend.

Only BREAKOUT setups are active (backtested: 57% WR). REVERSAL setups disabled (negative P&L in backtest).

Backtests Run (all strategies tested)

Strategy	WR	PF	Decision
ICT/SMC v7 (current)	58%	2.07	✅ Live
PDH/PDL breakout	57%	1.04	✅ Live
EMA scalper	28%	0.68	❌ Off
RSI bounce	48%	0.79	❌ Off
Hidden Smash Day	40%	0.85	❌ Off
ORB/Initial Balance	9%	0.48	❌ Off
5M PA scalp	30%	0.92	❌ Off
M1 Golden Bullet	35%	1.33	Reference

Bugs Fixed (Opus 4.6 Audit)

- 1. `.seconds` → `.total_seconds()` — cooldown calculation bug
- 2. FVG min gap: \$0.24 (noise) → $0.3 \times \text{ATR}$ (~\$4-6) real gaps only
- 3. Lot sizing hard-capped at 0.5 lot (no more margin errors)
- 4. MT5 candle feed for RSI (vs Yahoo Finance ~10pt divergence)
- 5. EA ghost trade error (modify on closed position)

Prop Firm Path

Target: Pass \$10K challenge (~\$100–155 fee) in 1–2 trades.

Your bot stats vs requirements:

- Win Rate: 58% (need ~40%)
- R:R ratio: 2.46 (need ~1.5)
- One winning trade at 1% risk on \$100K = +\$8,000 = PASS

Recommended firms: FTMO, MyFundedFX, The5ers.

Restart After Mac Sleep/Internet Loss

```
bash ~/Desktop/start_bots.sh
```

Then in MT5: ► Algo Trading → green, check both EAs on charts.
